

## Install Plantview–View a Shared Project–Link the Project Data–Sync Changes

This guide shows you how to install Plantview and view a shared project.

1.

After successful registration, you will receive an email with a link to **download** the latest Plantview Workspace which you need to install on your computer.

2.

Start the Plantview Workspace from the Windows Start Menu or Desktop link and **Login**.

Plantview Create an account

Showing 1 to 1 of 1 entries (filtered from 2 total entries) Previous 1 Next

4.

#### Option 1: Data resides on a disk.

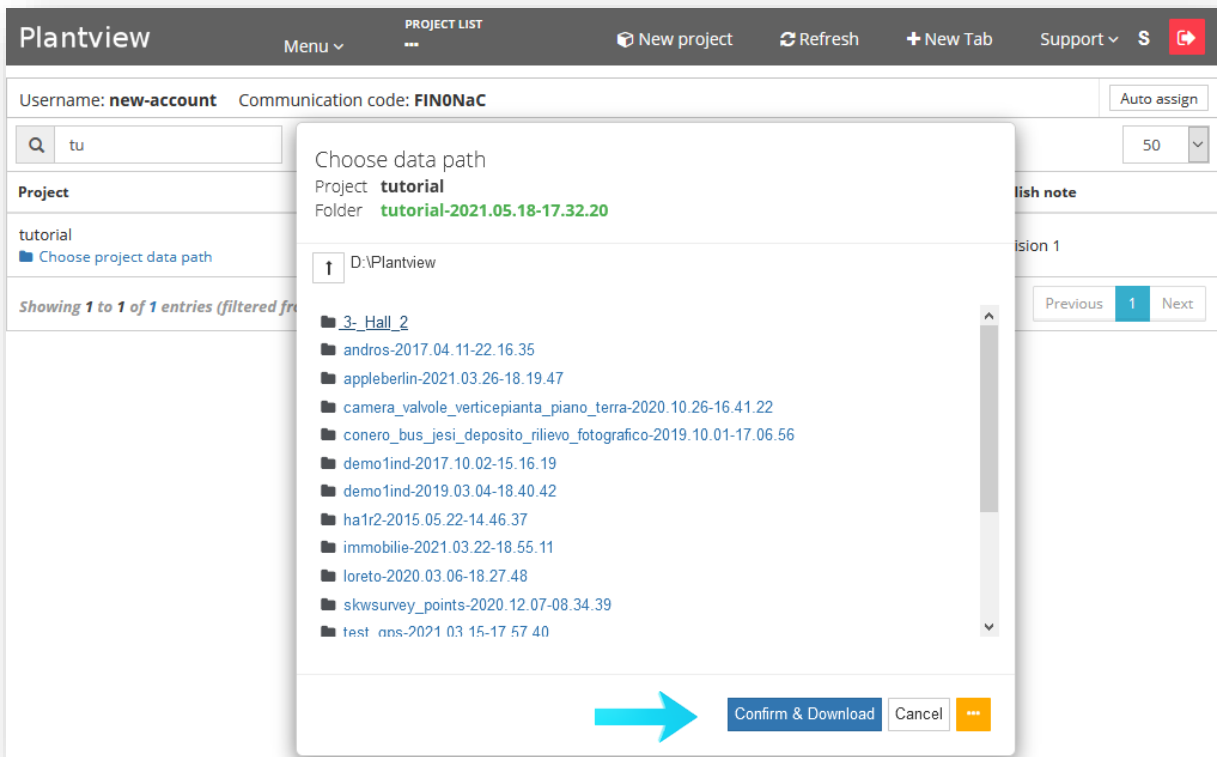

Go to the path where your project data is located. Once you have found the project data path the directory will indicate a match by turning green. Press **Confirm** to accept.

#### Option 2: Data has been uploaded to storage

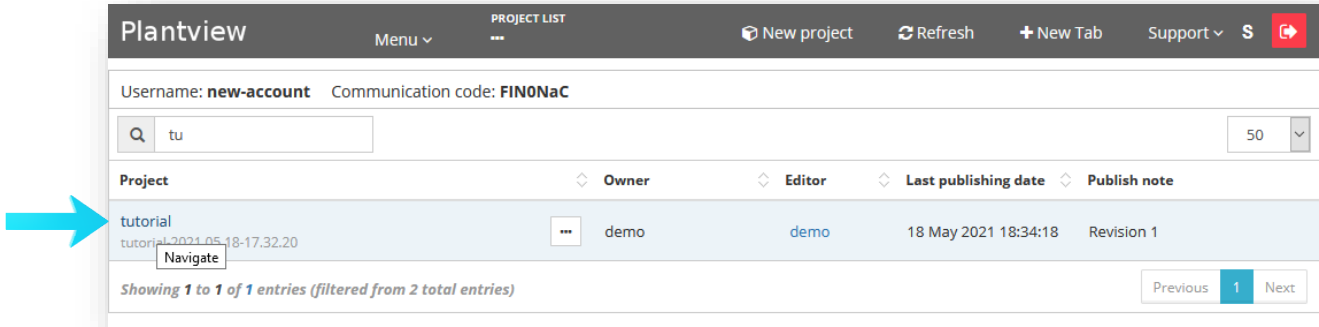

Choose the directory on your computer where the project data path should be created.

Press **Confirm & Download** to create the directory and download the data from storage

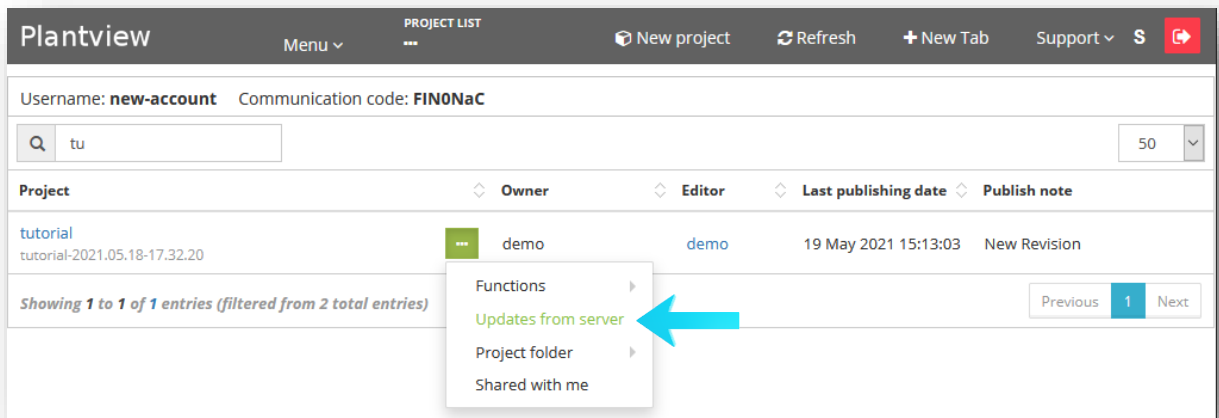

5. The project data has now been linked to the project.

Press on the Project name to **Navigate** and view the project content.

6. If at some point changes are published from a project editor the green Sync indication will appear. Press on **Updates from server** to sync

7.

Press **Sync Data** to sync any modifications to the latest published version and download any new or modified documents.

Press **Sync** to only sync any modifications to the latest published version without downloading any documents.
