

### Analyze your Data

Analyze is the operation that inspects and inserts data into the Plantview project database. Every time you add, delete or edit data in the project data folder a new analysis is required.

#### Use Plantview Workspace

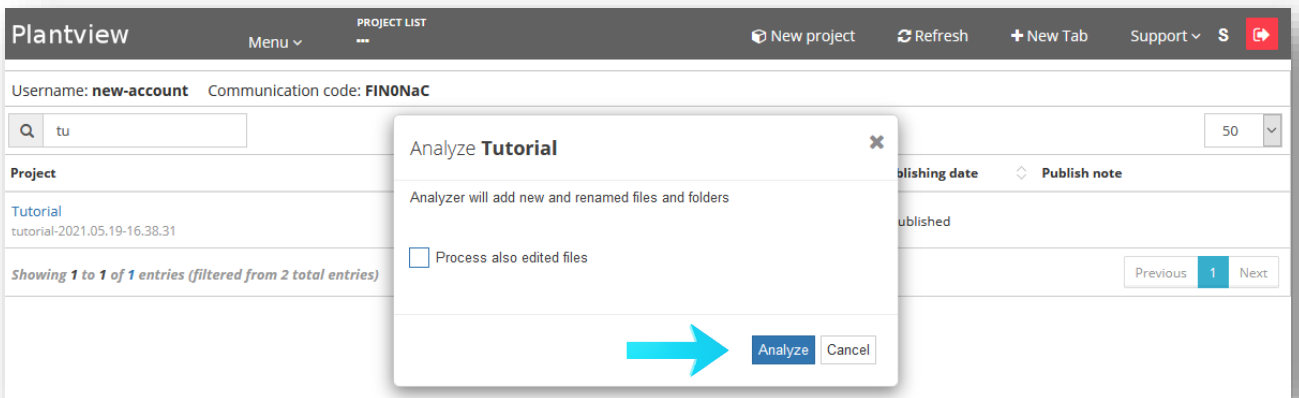

1.

Press **Functions/Analyze** to activate the analysis operation.

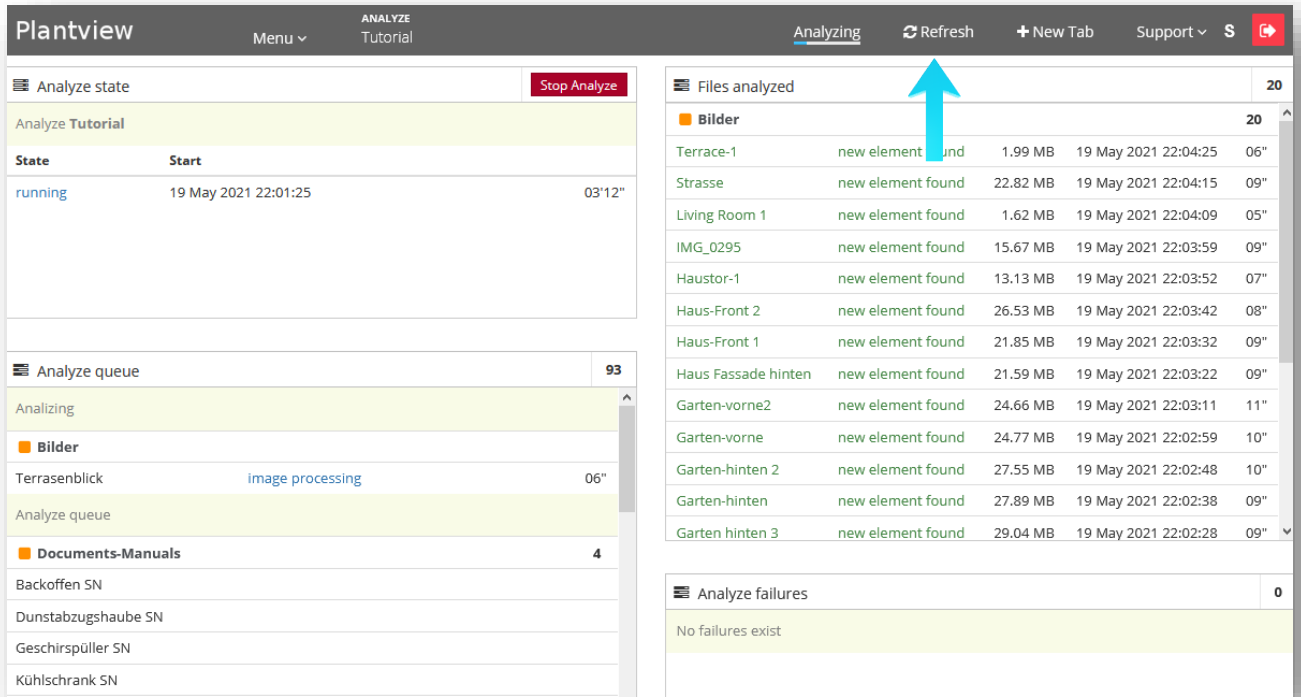

2.

Press the **Analyze** button to start the analysis.

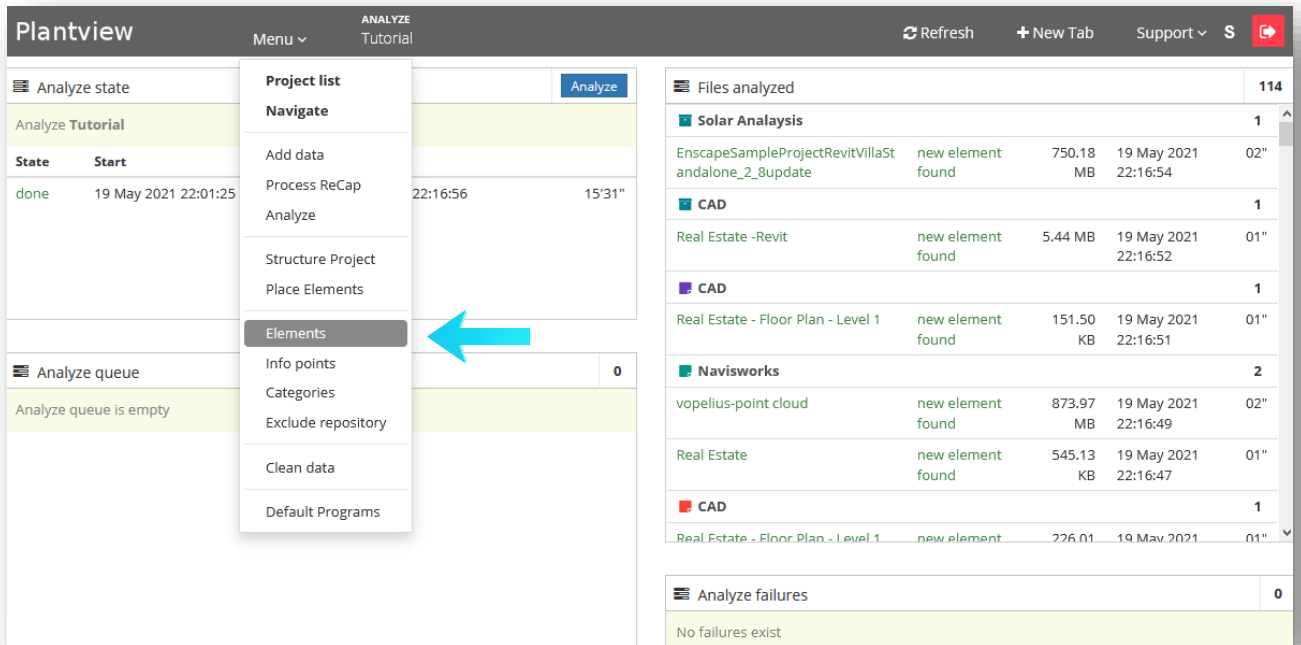

3.

In ANALYZE mode press the **Refresh** button to see the status of the analysis. When the analysis is complete you will be notified. Depending on the project size processing may take some time to complete.

4.

Press on **Menu/Elements** to view the data that has been inserted into the project database

5.

In the ELEMENTS mode, the analyzed data can be viewed or renamed.

Attributes can be added such as dates, altitude, categories, or account exclusions.

Advanced Filters facilitate the selection and assignment of attributes.

The screenshot displays the Plantview software interface in ELEMENTS mode. The main window shows a grid of image elements, each with a thumbnail, a title, and a date. A 'Filters' dialog box is open over the grid, allowing users to filter elements based on various criteria. The dialog includes fields for 'Filter Categories', 'Date from', 'Date to', 'Altitude from', 'Altitude to', and 'Filter element folders'. It also has a search bar and options to 'View this project as a selected account' and 'Show elements and info points excluded from selected account'. The background interface shows a top navigation bar with 'Plantview', 'Menu', 'ELEMENTS Tutorial', 'Refresh', 'New Tab', and 'Support'. Below the navigation bar, there are buttons for 'Select all', 'Unselect', 'Categories', 'Date/Altitude', 'Exclusions', and 'Delete'. A 'Filters' dropdown menu is also visible on the right side of the interface.

Thumbnail	Title	Date	Altitude
	Eingang	17 Mar 2021	
	Eingangstür	18 Mar 2021	
	Eingangstür	18 Mar 2021	12 m
	esszimmer-1	17 Mar 2021	
	Fahrräder	18 Mar 2021	66.7 m
	Garten hinten 3	18 Mar 2021	64.8 m
