

VIRTUAL TOUR mode

In this guide, the settings and interface of the virtual tour mode is explained

Prerequisite: You have placed your elements (Tutorial 6)

[Use Plantview Workspace](#)

Annotations: Toggle annotations in Virtual Tour

Viewing mode: Toggles display from Edit to View

Settings: Display settings

Search: Find neighbours and info points

Measurements: Opens the laser scan viewer

Go back: Returns to the previous position

Annotations: Toggle annotations in mini map

Interface Type: Full-desktop, Minimized-tablets

Neighbours actions: Optimization tools for virtual tour

Navigate: Opens NAVIGATE mode

Refresh: Refreshes the view

Close: Closes the view

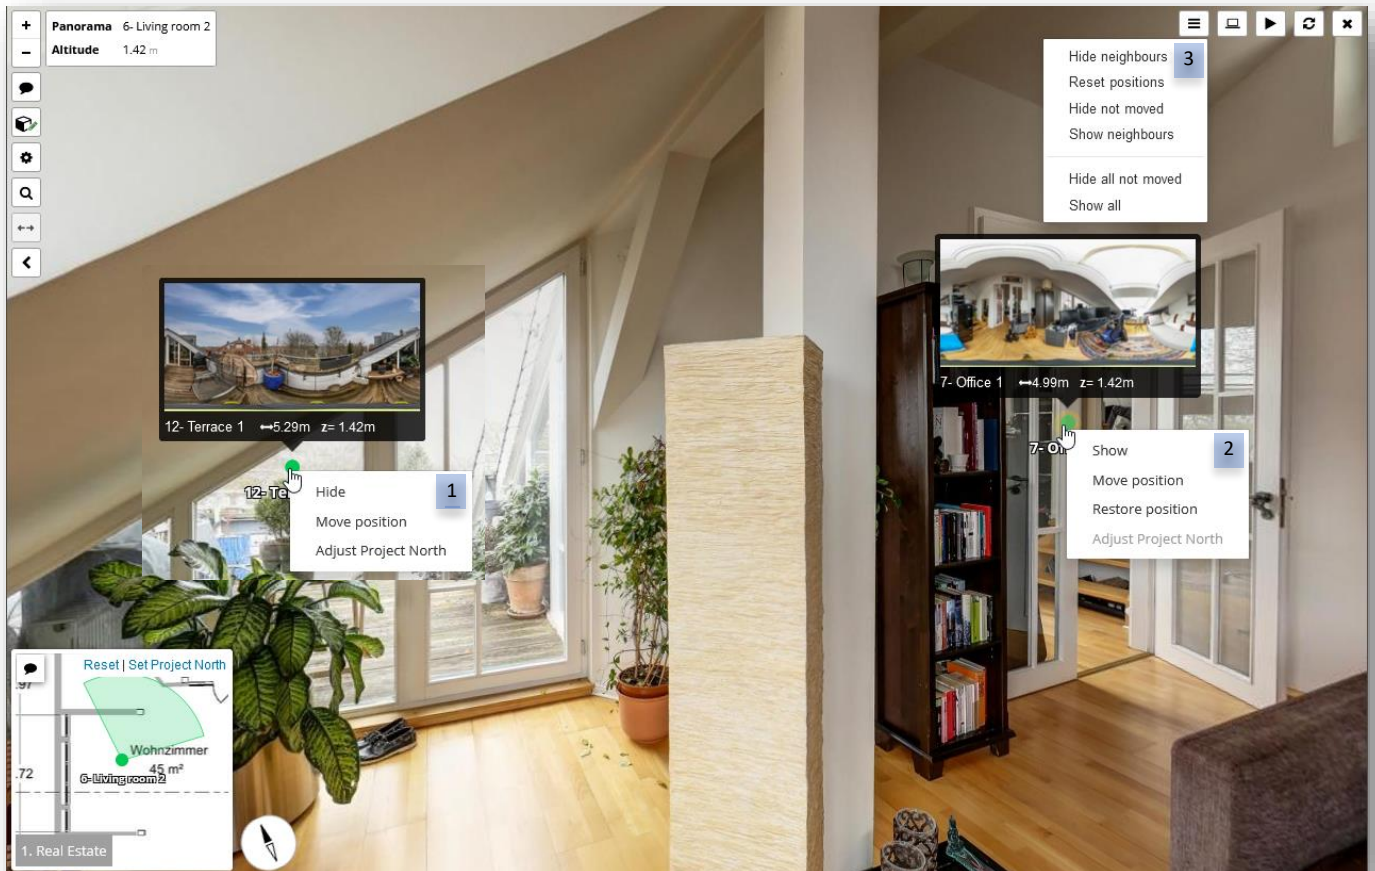

Element Information area

1 Settings (valid for all elements)

Panoramas and Scan Neighbours	Limits the number of panoramas and scans displayed
Hide overlapping neighbours	Limits the display of overlapping neighbours. Only the first one will be displayed
Layers and Images Neighbours	Limits the number of layers and images displayed
Neighbours distance	Limits the display of neighbours to a defined distance
Hide all neighbors	Hides all neighbours
Hide all info points	Hides all information points
Hide Project North indication line	Hides the project north help lines

1.

Neighbour actions are designed to optimize a virtual tour experience by customizing the display of neighbours.

1 With a right-click on the neighbour you have the following options:

Hide	Hides the neighbour from this position. Will be made transparent in edit mode, will not be shown in viewing mode
Move position	Moves the neighbour to a new position. Moved positions are highlighted
Adjust Project North	Fine Adjustment of the project north orientation. (see point 12)

2 With a right-click on a neighbour that was moved and hidden you have the following options:

Show	Shows the neighbour in this position. Transparency is removed
Move position	Moves the neighbour to a new position. Moved positions are highlighted
Restore position	Moves the neighbour back to its original position. Highlight is removed

3 Neighbours actions

Hide Neighbours	Hides all neighbours for the element. In Edit mode all neighbours show transparent, if you switch to viewing mode the neighbours will not be shown, same as viewing from a View account.
Reset Positions	Brings all neighbours back to their original positions.
Hide not moved	Hides all positions not moved in this element
Show Neighbours	Shows all positions in this element. Any hidden elements are now shown.
Hide all not moved	Hides all positions not moved in all elements
Show all	Shows all positions in all elements in the virtual tour. Any hidden elements are now shown everywhere in the virtual tour.
